

Records Management for Law Enforcement

Talon Incident Management System (TIMS) record management system for Law Enforcement is a powerful, customizable, expandable, and easy-to-use tool. The TIMS application has numerous must-have features:

- Detailed Incident Report Storage
- Ticket Storage
- Bicycle Registration Storage
- Activity Log Storage
- Spell-checking
- Dashboard
- Evidence Chain-of-Custody Handling
- Summary & Statistical Reporting
- Custom Search Manager
- Maintenance & Customization
- Expandable with add-on modules

TALON SOFTWARE SUITE

Core Technology Corporation's Talon software suite for the criminal justice and public safety communities facilitates secure, cost-effective, user-friendly access and capability to view, share, and record sensitive data.

- Data Sharing
- Crime Mapping
- Records Management
- Officer Daily
- Call for Service
- Mobile
- Advanced Authentication

CONVENIENT

One logon and password provides access to all applications within the Talon suite. Navigation between functions is seamless, allowing the Officer to concentrate on the task-at-hand not the software.

SECURE

Security is paramount to Core Technology, so our solutions incorporate multiple authentication factors and exceed the Criminal Justice Information Systems (CJIS) security policy encryption requirements.

Comprehensive Data Capturing

Capture as little or as much incident information as you desire with any or all of the easy-to-use incident component buttons.

The screenshot displays the Talon 2.08.20 application window. The current user is NancyAdminSup. The interface shows a detailed incident report for Report # 14-000002. Key details include:

- Incident Header:** Report # 14-000002, Date/Time: 03/24/2014 16:03, Entered by: SUP. COLANDREA NANCY, Reporting Officer: SUP. COLANDREA NANCY, Status: Open, Ready to Send Original Failed.
- Category:** BURGLARY, Description: FORCED ENTRY, Occurred between: 03/24/2014 09:00 and 03/24/2014 15:30.
- Supplement Summary:** A table showing Supplement # 0, Date 03/24/2014, Officer SUP. COLANDREA NANCY, Entered by SUP. COLANDREA NANCY, and Review Status Not Reviewed.
- Offenses:** A table with columns for File Class, Description, and counts. Entries include NONAGGRAVATED ASSAULT - 13001 (0), DAMAGE TO PROPERTY - 29000 (0), and STOLEN PROPERTY - 28000 (0).
- Involvement:** A table with columns for Name, Sex, Race, DOB, Involvement, Address, and Phone. Entries include ADAMS, JOHN PATRICK (Suspect/Victim), ADAMS, SHIRLEY LEE (Suspect/Victim), and TURNER-ADAMS, KELLY (Suspect).

Powerful Reporting & Flexible Customization

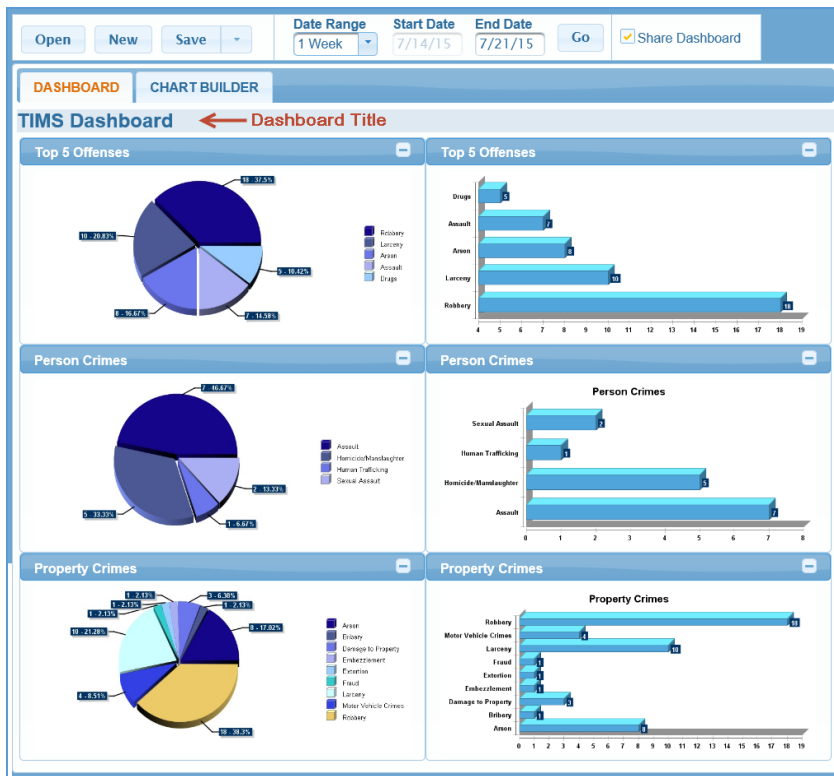

Over 40 standard reports are available with TIMS to obtain detailed or statistical information. Customizing the field options to track items of specific interest to you makes the already report-rich TIMS system even more useful because you get exactly the report you need (e.g., gang related drug crimes in the Cherry Hill Neighborhood).

The **Custom Search Manager** feature of TIMS gives you the ability to create and save your own custom searches, where you define the filtering criteria as well as the columns that are given in the search results. Search results will display on the screen by default, but you may also send the information to a PDF report or an Excel Spreadsheet.

Feature Rich & Powerfully Effective

Dashboard

Grouped together on one screen, the TIMS Dashboard condenses the large amount of information stored in your database into multiple easy-to-read charts. You will see both pie and bar charts for "Person Crimes", "Property Crimes", and the "Top 5 Offenses", which shows the five most frequently occurring offense groups.

Expandable

Because TIMS is part of the Talon Suite of software, other applications or add-on modules like the TIMS Supervisory Review and Workflow add-on module can provide great time savings and additional functionality. Contact Core Technology for the many offerings available.

About Core Technology

Established in 1981, Core Technology provides specialized software solutions for the criminal justice and law enforcement communities. Core's solutions are available to local, regional, state, and national agencies that want to access, share, and exchange information as well as communicate effectively with each other.
