TALON DATA EXCHANGE SOLUTIONS

A woman in a white lab coat with a police badge, looking down at a document. The background is a blue-tinted image of a modern building with large windows.

TDEX

Expectations continue to **Ex**pand.

Today, the justice community is being asked to do more than ever. Timelines are shorter. Budgets are tighter. Personnel are stretched thin.

In these times, one proven way to increase workflow and improve outcomes is through a smart, seamless system for accessing, sharing and managing information.

It's time to put Talon Data Exchange to work for you.

Welcome to the age of TDEx.

Talon Data Exchange — TDEx for short — is an easy-to-use platform for simple, secure data exchange, whether it's across departments or across the country.

With TDEx, information is delivered directly when and where you need it. And it's delivered in precisely the way you need it, with individual modules tailored to meet the needs of all criminal justice partners.

Easy accessibility to a depth of critical data creates an invaluable snapshot of how municipalities are policing, prosecuting, managing jail populations, handling emergencies, and protecting the public at large.

CORE
TECHNOLOGY®

Real-time data, delivered right away.

Existing manual processes for exchanging data within and between departments wastes time and resources. Instead of writing, typing, printing, logging and delivering information by hand, TDEx does it all with the push of a button. Electronic data is instantly catalogued, time-stamped, and automatically updated. So you always know what information is being shared, who has it, and where it lives.

No more silos of information. Better, agency-wide communication.

Cleaning up paperwork hassles to create more accurate, standardized information exchange is only the beginning. Because the value of TDEx lies not only in what you save — but what you gain. Our solution improves your ability to do your job better because it increases your ability to send, share, organize, and analyze critical information. Knowledge is power. TDEx helps you harness more of it.

An open platform that's accessible for anyone.

TDEx runs on an established, open platform accessible to the entire justice community. That means you can run searches in your own system and connect with any department, using any data management tool, whether it's yours, ours, or one from another third-party resource.

No matter where you are, and regardless of the size of your municipality, TDEx gives you the greatest possible access to national, state and local data — a true force multiplier for any agency.

A new dimension in data security.

When you think of data security, you think of protecting the integrity of the information you rely on. And, no one does that better than Core with TDEx. But the other way TDEx works for you is in how data exchange improves the security of public servants and people everywhere.

Instant access to complete, up-to-the-moment information means that police officers and jail staff are made safer by providing complete backgrounds, including priors and associates. Courtrooms are made safer by knowing about defendants and their histories well before they appear. And communities are made safer because in-depth data can help spot trends, avert or reduce crime, and lessen the risk of negative or even violent outcomes with criminals.

Improving how data is exchanged leads to better criminal justice work, and can make a meaningful difference for all the citizens you serve.

A hand holding a fountain pen, poised to write on a document. The background is a blurred wooden structure, possibly a bookshelf or a piece of furniture, with a green light visible on the right side.

TDEx

redefines what data can do.

Data exchange that works for you, and learns from you.

In municipalities nationwide, TDEx is helping agencies make the most of modern data exchange technology. Importantly, every one of our customers is also an ongoing contributor in helping us evolve and strengthen our platform so that it works smarter for you.

"I absolutely recommend Core. Core has saved us a lot of money and allowed us to be in compliance more than what we were with what we had [before]."

Charles Lackey, Wayne County, Michigan

Trusted access from mobile and desktop applications.

From smart phones to tablets to laptops and more, TDEx is totally interoperable. Built upon trusted Core/Talon technology, our data exchange is fail-safe, quick to learn and easy to customize.

Works across agencies. With unique modules for each.

While the need to efficiently share data is universal, we understand that individual agencies have unique needs. Which is why TDEx provides specialized solutions for dispatchers, law enforcement, prosecutors, courts and jails. Each agency-specific TDEx product can work on its own — and coordinate seamlessly with other agency versions, as well.

TDEx Law Enforcement

With the needs of law enforcement in mind, this solution provides a way for personnel to search other databases, all from within your own Records Management System so there is no need to log into a separate application, make phone calls, or send emails in order to share information.

TDEx Prosecutor

A complete set of tools for the prosecutor's office, our solution offers easy access to, and reporting of, all information exchanged that's shared with others. This information can automatically populate Case Management Systems and Document Management systems to save time and increase accuracy.

TDEx Jail

Jails benefit from information about who is coming into your system. Information from law enforcement can automatically populate Jail Management Systems allowing you to swiftly move people — including a "Now Arriving " view which help prepare for the influx of inmates.

TDEx Justice

Our justice solution provides an exchange of data between law enforcement and the prosecutor and/or court to save time, eliminate duplicate data entry and reduce face-to-face interaction.

Ready to take the next step?

For one agency or many, TDEx is the right answer for right now.
